Project Name	Laptop Request Catalog Item
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem–Solution Fit ensures that the identified challenge in the laptop request process is effectively addressed by the proposed Service Catalog automation. It validates that the new system truly meets user needs and resolves inefficiencies in the current workflow.

Purpose:

- ☐ Streamline the laptop request process by replacing manual steps with an intuitive, automated Service Catalog in ServiceNow.
- ☐ Reduce delays and data errors through dynamic forms, guided inputs, and validation checks tailored to employee and admin workflows.
- ☐ Accelerate adoption by aligning the solution with users' existing request and approval habits, minimizing the learning curve.
- ☐ Enhance organizational efficiency and trust through transparent, trackable requests and governance-friendly deployment.
- ☐ Understand pain points in current request handling and design a system that delivers faster approvals, accuracy, and user satisfaction.

Template:

The project "**Laptop Request Automation through Service Catalog**" addresses a major inefficiency in the organization's asset management process. By replacing the slow, manual laptop request workflow with an automated ServiceNow catalog item, it ensures faster approvals, accurate data entry, and a seamless user experience. This solution enhances transparency, reduces administrative burden, and minimizes human errors through dynamic fields, guided instructions, and form validations. With integrated governance tracking and deployment control, the project establishes a smarter, more efficient, and user-centric approach to handling IT asset requests within the enterprise..
