

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	2 November 2025
Team ID	NM2025TMID05911
Project Name	Laptop Request Catalog Item
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution

Product Number	Functional Requirement	Sub-Requirement
FR-001	User Request Interface	The user must be able to select standardized laptop models (e.g., configurations) from a single, clear list.
FR-002	Mandatory Data Capture	The form must enforce the entry of a mandatory business justification for the laptop request.
FR-003	Automated Manager Approval	The system must automatically route the request to the requester's direct manager for approval immediately upon submission.
FR-004	Conditional Financial Approval	If the selected laptop exceeds a pre-set cost limit , an additional financial approval must be triggered.
FR-005	Fulfillment Task Generation	Upon final approval, the system must automatically create and assign a procurement/allocation task to the IT Hardware team.
FR-006	Status Communication	The requester must receive automated email notifications for the submission, approval, and completion of the request.

Non-Functional Requirements:

Following are the functional requirements of the proposed solution

Product Number	Functional Requirement	Sub-Requirement
NFR-001	Performance (Response Time)	The catalog item form must load and submit within 3 seconds under typical user load.
NFR-002	Security (Access Control)	Access to the request form must require Single Sign-On (SSO) via the corporate system to ensure authentication.
NFR-003	Usability (Clarity)	The form must use simple, non-technical language and be designed for an intuitive user experience.
NFR-004	Reliability (Availability)	The service must maintain an availability of 99.5% during scheduled business hours.
NFR-005	Maintainability (Configuration)	IT Administrators must be able to update the list of available laptop models and pricing through an administration interface without system downtime
NFR-006	Integrity (Asset Update)	The system must automatically log the approved asset assignment in the Configuration Management Database (CMDB) upon request completion.
